A Motorist Bumps the Grader

A motorist who was returning to the city Monday morning from one of the Beaches ran into the big Government Grader on the Base Line east of the Grove, and came off second best in the encounter. Although it was broad daylight, the motorists didn't see the extended blade with the flag on it.

At the Danger Spot.

That dangerous grade opposite Reeve Goetz farm on the Baseline was the scene of another accident Sunday noon. Two cars met here, and the west-bound skidded in the loose gravel, and bumped the East-bound Pontiac. The latter swerved across the road and nose dived down the nine foot grade into a pond. Over a hundred motorists congregated around in a short time, but nothing could be done until a service truck with a derrick arrived. The injured occupants of the cars were taken to the City.

Jack McNichols Bumped Into

On Sunday last, while Jack McNichols, the popular agent at the local station, was driving thru the St. Albert district, he had the misfortune to have another motorist pop quickly from a side street and bump into him. Jack got off with a few dents in his fender; but the other chap, a Mr. Poppei, received a smashed fender and a broken wheel. An amicable arrangement was reached by each agreeing to foot his own repair bill.

Truck Runs Off the Grade

While a loaded truck of the Veteran Transfer Co. was proceeding along the soft piece of grade on the Baseline opposite the Javorsky farm, Saturday morning, the driver took it too near the edge of the road, and the latter gave way, dumping the truck into the ditch. The van was loaded with the furniture of a Seba Beach cottager, who was returning to the City. A lady and child were in the front seat with the driver and escaped with a slight shaking up. A man and lad who were on top of the load at the rear were catapulted from the load to the opposite side of the ditch, but were not severely injured. The truck driver had his collar-bone fractured.

All Ready for the Grain.

With 439 Alberta Wheat Pool elevators ready for the 1930 crop, and with threshing already under way in Southern Alberta, pool elevator managers are looking forward to a big year. Deliveries of wheat in southern Alberta have already started, and elevators all over the province are now ready for taking in grain.

Cut the Weeds!

Mr. Kirk, Provincial Weed Inspector, is warning those who do not destroy noxious weeds are liable to a fine. This applies to the Town as well as individuals, and a little co-operation between the two would be a good thing.

Planning, Saving, Investing

"To have AND to hold," when applied to money, does not seem to be an easy lesson for most people to learn. The word "and" is stressed because during the recent stock market slump there have been millions who have failed to do the "holding." They have emerged as losers. They have allowed the lure of speculation to divert their time and attention from their regular occupations and interests to a field of activity about which they knew next to nothing. So it seems that most of us need to concentrate more on the "holding" part of our financial plan.

So writes Leroy D. Peavey, president of the well known Babson's Statistical Organization, who, from an income-producing point of view divides the average individual's life into roughly three parts. The first, from about age twenty to age thirty, might be called the period of preparation or getting settled. The second, from thirty to the late fifties, is the period of accumulation. The third, from the late fifties on, is the age of retirement or at least of lessened earning power.

No matter how much time and money may be expended during the teens and twenties in preparing young people for their life work, they can never, says Mr. Peavey, be independent during the last period of life unless they have made good use of those twenty-five or more golden years in the second period. It is during this period of accumulation that one's surplus must be built up and judiciously invested if one hopes to be independent the rest of his days. His watchwords should be Plan, Save and Invest.

Planning means the making and using of a budget. The budget is the floor-plan of your financial structure. Fit it to your own situation and then stick to it, instead of shoving it after a couple of trials. Of what good are blue prints if the structure does not grow up in accordance with their specifications? And one of these specifications will be the proportion—whatever it may be—of your income that is to be set aside as savings. Another specification will be the determination to have a home of your own some day—one that eventually will be free and clear. Because it is free of mortgages or other claims, it will stand between your family and distress. Life insurance and other sound investments should likewise be included.

The second watchword, "Saving," has been brought to the consciousness of the people of this generation by many years of educational effort. It has been adopted by hundreds of thousands of Canadians as evidenced by savings accounts in post offices and banks. It was given a great impetus during the war when, through the urge of patriotism and in response to the call to sacrifice to "win the war," thousands of people who never before had invested in a bond bought Victory Bonds, and thus learned the lesson of how easy it is for money to accumulate and multiply itself through interest payments. But the lesson of saving is one that must be taught to each successive generation, and there should be no slackening in the effort. It is a lesson that all parents should see their children learn early in life and continually practice, until the savings habit is formed.

When it comes to "Investing," you have the choice between invoking the almost unbelievable power of compound interest when harnessed to regular monthly savings, on one hand; on the other, putting the money into well seasoned securities. In the first case you need no particular advice, for in its operation compound interest is both useless and automatic. In the second instance, that is, with investment securities, you need advice of the most discriminating sort. This fortunately, you can easily obtain from your own banker.

You will want to have among your investments some good sound bonds anyway, and then if your available funds permit, some of the best stocks. The latter should be bought outright and never on a short-term margin. Remember this too. It is wise to keep a part of your funds in liquid form—that is, in cash or such short-term securities as can quickly be converted into cash. Then you will be prepared for emergencies. You might need this money for a personal emergency, or for some special investment bargain in the market that had come to your attention.

The point is to put each spare dollar to work, twenty-four hours a day and each day in the year, earning more income for you. Your ability to "spare" these dollars for such a proposition will lead to a surprising increase in your "sparing" power; that is your ability to save. You will be able to see with your own eyes the rising structure of financial independence that is going to stand you in such good stead later in life. But in order that your future income may be ready when you need it, start to build that income NOW.

The word "investment" should be broadly interpreted to include, not only bank accounts and securities, but insurance policies, your own home, real estate, mortgages, and other forms of capital. Life insurance is indeed important. It not only helps people to save, but it is a protection as well as an investment. Every person should carry life insurance, but, on the other hand, it is not the part of wisdom to place all your savings in life insurance. Follow instead the practice of diversifying your investments—part in a savings account, part in life insurance, and part in sound securities.

And, above all, turn to hard work, initiative and perseverance, as the right means of accumulating sufficient funds for your needs, rather than the purely speculative stock market in the hope of getting something for nothing. Lastly, carry out the principle that "godliness with contentment is great gain," in your finances as well as in the rest of your life.

Report On Gas Fields

Member Of Geological Survey Of
Canada To Make Report On
Saskatchewan

Dr. G. S. Hume, of the Geological Survey, of Canada, will make an immediate survey from all available data, of the prospects of finding gas in Saskatchewan, in suitable quantities within the province.

He will not make any actual investigation in the field at the present time, but having visited each city interested in gas development and gathered material from other sources will make a report based on geological information already obtained by various survey parties.

This report, framed as it affects the various cities interested, will be submitted to the Dominion Government, which in turn will forward it to the provincial government. The joint committee, representative of four cities of Saskatchewan interested in the gas question, will then be put in possession of all the facts obtained.

This was the outcome of a conference held at the parliament buildings at Regina, when Dr. Hume met five members of the Saskatchewan Government and also of the four-cities gas committee.

Is Baby Teething?

Teething time is a time of worry to most mothers. The baby is nervous, fretful, feverish. His little gums are swollen and sore, diarrhoea, constipation, colic and sometimes convulsions set in—neither baby nor mother can sleep.

These troubles can be quickly banished, however, through the use of Baby's Own Tablets concerning which Mrs. Louis Grubb, Teeswater, Ont., says—"I have used the Tablets for all my babies while teething, and have found them a splendid medicine."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Wheat Pool Membership

The Canadian Wheat Pool now has a membership of 142,000, the number of members having been increased by more than 2,000 within the year, according to Gillis Percell, of the Canadian Press.

Many infants are infested by worms which cause suffering, and if not promptly dealt with may cause constitutional weaknesses difficult to remedy. Miller's Worm Powders will clear the stomach and bowels of worms and will set upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

First Transcontinental Levels

The first Canadian transcontinental line of precise levels was completed by the Geodetic Survey of Canada in 1916.

A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

B.C. Hydro Development

Possibility of developing 3,000,000 horse-power from rivers along the coast district of British Columbia is disclosed by engineers.

Soft corns and warts are ugly, painful and irritating. Remove them quickly and surely with 'Douglas' Egyptian Liniment.

Crude Oil Consumption

At present only about 2 1/2 per cent. of our crude oil consumption is produced in Canada.

Have Minard's Liment on your shelf.

"FRUIT SALT"

Doctors Warn
Against
Drastic
Purgatives

Physicians know the danger of using cheap cathartics that create a harsh, unnatural intestinal activity. They know that ENO'S "Fruit Salt" is more than a laxative. It is a delicious health beverage that sweetens and tones up the entire system—and that its daily use—just a dash in a glass of water, every morning—is an aid to vigorous good health.

No Cause For Alarm

Says Russia Will Not Be Factor In
Wheat Exportation For Some
Time

Thomas D. Campbell, of Hardin, Mont., who has been called the world's largest wheat grower, returned recently from a trip to Russia as agricultural consultant to the Soviet, and announced that it would be longer than alarmists thought before Russia was a factor in any export field.

As the country's five-year program progresses, he said, the needs of the country also increase. The more she grows the more she consumes. It will be at least three years before the Soviet government is a factor in the export of grain or any other commodity. Very soon the internal needs of the country will call for 1,000,000,000 bushels of wheat annually, just as an example.

Pioneer Mountie Dies

Peter O'Hare, 77, pioneer mounted policeman of the west, died recently at Maple Creek. Since the earliest days of the police in Saskatchewan Mr. O'Hare was associated with all activities, taking part in the Riel Rebellion engagement. His service extended over 40 years.

Protect the child from the ravages of worms by using Mother Graves' Worm Extirminator. It is a standard remedy, and years of use have enhanced its reputation.

Honey has become so popular in the British Isles that while 1,100 tons were produced there in the last 12 months, fully 3,500 tons, valued at \$2,000,000, were imported.

Encourage Sheep Industry

Economic Survey Of Sheep Ranches
Of Western Provinces To Be
Undertaken

An economic survey of sheep ranching in Saskatchewan, Alberta and British Columbia, is being undertaken by the Dominion Department of Agriculture, under the direction of the agricultural economics branch in co-operation with the Dominion Experimental Farms. This is the beginning of a programme of research work in agricultural economics on behalf of the livestock industry.

TWICE BENEFITED BY SAME REMEDY

Recommends
Lydia E. Pinkham's
Vegetable Compound

Cobourg, Ontario—"Years ago when I had a sick father and a nursing baby to care for, I got all run down and I took Lydia E. Pinkham's Vegetable Compound to do my work. Another time at another time I had severe headaches and felt tired all the time. I took seven bottles of the Vegetable Compound and felt like a new woman. I recommend it to any woman who is at the age when she needs building up."
—Miss T. E. SLEMMAN, R. R. 4, Cobourg, Ontario.

Plan For Wholesale Emigration From Britain As Solution Of The Unemployment Problem

Wholesale emigration under the direction of public utilities, which would be given special concessions for buying or leasing large tracts of vacant land which would be developed with the aid of the British and Dominion governments, is Labor's newest scheme for a solution of the unemployment problem which is costing Great Britain \$700 per minute.

Horace Greeley's "go west, young man," would become "go east or west" for the plan embraces all parts of the Empire. The idea will be brought up at the forthcoming Imperial Conference, in London, England, with the hope that the Dominions will approve the scheme and agree to a partnership with the Labor Government in finding a place for the more than 2,000,000 persons unable to find work in Britain.

The plan is a new approach on the government's part that the old systems of homesteads and other piecemeal movements of people were wholly ineffective under modern conditions and that the Dominions were also opposed to any haphazard they would only swell the ranks of unredempted influx of British where their unemployed.

The scheme is therefore a pretentious plan to find a place for those at present unemployed and not wanted. The utilities would be given co-operation in acquiring land and the development of virgin territories would be left in the hands of the British and Dominion governments would aid in carrying out a comprehensive plan to settle the new territory and emigrants would be furnished as man power for the markets needed to establish a new economic frontier.

The government is pushing the project for a new type of pioneer, and the unemployment problem of the even claim the idea is a solution of Dominions as well, since the opened territory will be open to the workless there as well as England. It also claims that thousands are willing to leave immediately, but the uncertainty of unemployment holds them in England for their role.

It is understood that one Dominion has already endorsed the scheme. There is no anticipation of Britain or among the proponents trouble in finding investors in the event the plan is adopted.

To Relieve Unemployed

Nearly 12,000 Extra Men Engaged By C.P.R. On Improvements From Coast To Coast

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway's programme of construction, maintenance and improvement, from coast to coast. Construction work of all kinds is being done both directly by the company and also by contractors, the company itself employing some 8,000 men in "extra gangs" throughout its system. The varied programme includes the laying of branch lines; repairing and renovation of right-of-way, bridges, tunnels, stations, and other buildings. The men, in general, are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

A motion picture screen which permits showing pictures outdoors and in lighted halls has been invented by two French engineers.

"I have lost my biggest creditor." "Is he dead?" "No, there was no help but to pay him."—Buen Humor, Madrid.

Largely Self-Supporting

Many Canadian Industries Capable Of Supplying Home Market

According to figures issued by the Dominion Bureau of Statistics, the Canadian dairy industry provided over 98 per cent. of the \$4,891,765 pounds of cheese consumed in Canada, in 1929, and two-thirds of the 299,348,271 pounds of butter consumed. Sugar consumption, in 1929, amounted to \$44,963,712 pounds, of which 98 per cent. was refined in Canadian refineries. Salt consumption amounted 497,371 tons, of which two-thirds was Canadian-manufactured. Slightly over 50 per cent. of the 14,077,477 tons of coal made available to the Canadian public in the first six months, in 1930, was mined in Canada. The value of radios and radio parts made available to the Canadian public, in 1929, amounted to \$31,750,293, of which nearly 70 per cent. was manufactured in Canada.

(By Anabelle Worthington).

2551 Unique wrapped skirt treatment distinguishes this model of navy blue crepe silk. The hips are snugly fitted. The waistline is belted at normal, which is generally becoming.

The surplus bodice is rolled into revers that show smart facing in white crepe silk. It's an exclusive type of slenderizing lines that is charmingly appropriate for all-day occasions.

Style No. 2551 can be had in sizes 16, 18 years, 36, 38, 40, 42, 44 and 46 inches bust.

It is lovely in black and white chevron, printed voile with white trim, hyacinth blue chiffon, lime green cord dotted crepe silk and aquamarine blue crepe de chine.

Canada Holding Trade Position

Dominion Maintains Place Among Leading Trading Countries Of The World

Ottawa, Ont.—Canada maintained her position among the leading trading countries of the world in the fiscal year ending March 31, 1930, despite a sharp decline in export trade and a slight falling off in import trade. This is disclosed in the condensed preliminary report on the trade of Canada, 1929, issued recently by the Dominion Bureau of Statistics.

The year was marked by an unfavorable balance of trade of \$103,335,512 compared with a favorable balance the year before of \$123,216,984. This was attributed to the falling off in the export of grains, particularly wheat, to the United Kingdom and continental Europe, due partly to lower yields.

Canada's total trade in the last fiscal year was \$2,363,212,000 compared with the total of \$2,654,575,000 in 1929, and \$2,369,555,000 in 1928. It is thus seen that while trade last year showed a falling off in comparison with the year before, it was still in excess of the total in the year ending March 31, 1928.

Imports last year amounted to \$1,248,278,382, compared with \$1,265,679,091 the previous year. The sharp decline in exports is indicated by the total figure of \$1,114,933,670, compared with the 1929 figure of \$1,388,896,670. The decrease in exports was \$243,963,000, and the decrease in imports was \$147,655,568, 17.6 per cent. for exports, and 14.4 per cent. for imports.

In export trade Canada leads the world in the export of printing paper, nickel, and asbestos; occupies second place in exports of automobiles, wheat and wheat flour, and fourth place in exports of wood pulp as well as a very high place in the world's exports of such staple products as lumber, fish, copper, raw fur, whiskey, meats, rubber tires, farm implements and raw gold.

Sidewalk cafes have been introduced in Havana.

Valuable Resources Going To Waste As Vast Quantities Of Natural Gas Are Burned In Air

Asbestos In Manitoba

Valuable Mineral Located At Two Points In Northern Part Of Province

The reported discovery of asbestos at two points in Northern Manitoba may broaden the range of Manitoba's mineral wealth, but cannot affect the national leadership in asbestos production, which is already securely held by Canada. Canada produces about 74 per cent. of the world's supply of asbestos, Rhodessa about nine per cent., Russia about six per cent., and South Africa about six per cent., the remaining production being distributed in small quantities among other countries.

Asbestos, although a mineral, consists of silk-like threads which can be spun and woven much as a textile is. On account of its fire-proof quality it is used extensively in building and in manufacturing. Canadian shipments, in 1929, amounted to 306,055 tons, valued at \$13,172,581, an increase of 12.1 per cent. in quantity, and 17.2 per cent. in value over the previous year.

Good Road Making Material

Met With Success In Extraction Of Tar From Sands In Northern Alberta

Success in the extraction of tar from bituminous sands in the McMurray area of Northern Alberta is said to have crowned ten years of effort on the part of D. K. A. Clark, of the University of Alberta. It is reported that 95 per cent. pure tar was taken from the sands in recent experiments and it is believed that thousands of dollars may be saved in road-building and other developments as a result of the availability of this material.

JUDGES FOR CANADIAN NATIONAL COMMUNITY PROGRESS COMPETITIONS

Suppose by some accident, all the coal mines of Alberta should suddenly be set on fire and, before the fire was extinguished, a full year's output of Alberta coal should be destroyed. And suppose, while the fire was going on, that the government took no steps to prevent this gigantic loss. What an outcry would echo from ocean to ocean in Canada against such a national scandal. Yet, in another form, that is exactly what is taking place day by day.

Natural gas, more efficient for heating than coal, is being burned in the air in Turner Valley annually at a rate nearly equal to the entire Alberta production of coal in 1927.

In 1927, Alberta produced a total of 6,034,164 tons of coal. In 1929, Alberta burned, in the air, in Turner Valley, 109,500 millions of cubic feet of natural gas, equivalent in heating value to 8,570,000 tons of coal.

In 1929, Alberta coal production increased to 7,335,489 tons of coal. But, at the rate new wells are being drilled in Turner Valley, the natural gas would be burned as waste there in the coming year, with the added Alberta's banner year of coal production. These are not fanciful calculations. They are careful estimates, made conservatively, by gas and heating engineers. Enough natural gas went to waste in Turner Valley, between August 1, 1928, and August 1, 1930, to supply the needs of present Alberta users for 15 years. Assuming that Saskatchewan were to use eight billion cubic feet per year, as compared with Alberta's six and a half billion, enough gas went to waste in that time to supply Saskatchewan for 12 years.

Compared with coal, enough gas goes to waste in Turner Valley every day to equal nine train loads of high grade coal, each train being of 50 cars, and each car containing 40 tons. Thus, fuel equal to 18,000 tons of coal goes to waste. Multiply that by 365 for the total waste each year, and the figure looks like light years in connection with a star on the outer rim of the universe, 6,750,000 tons a year to be exact. The daily waste, on an average from August, 1929, to August, 1930, amounted to 300,000-000 cubic feet. Against this an average of only 20,000,000 cubic feet per day was used.

If these train loads of heat had to be shipped out of Alberta just as her wheat is shipped, the railways would have to supply facilities for two-thirds more trains than in the biggest rush season of the year. Ordinarily about 600 cars of grain are inspected at Calgary daily following the harvest. At that rate, on the same basis, these cars would constitute 12 trains. Therefore it would work out to nine heat trains and 12 wheat trains per day.

But that is only part of it. The wastage between August 1, 1928, and August 1, 1929, on the same basis, would have worked out to six train loads of heat per day, so, in a like ratio, the wastage for that year was just two-thirds of the wastage figured out for the season 1929-30.

These figures have all been for the past. The future can hardly be guessed. At present 50 wells are producing, and it is possible that 250 similar wells could be brought in without difficulty. Then the figures would be just multiplied by five. And Turner Valley is only one valley. There are others with possibilities according to geologists and experts in the oil game.

All airports in the United Kingdom now are government controlled.

"Do you look out for when fishing away?" "Of course I do—the policeman."—Humorist, Hamburg.

DRIVE ON LABOR PARTY STARTED BY CHURCHILL

Minster, Kent, Eng.—A plea for unification of the Conservative party in an effort to arouse the party's supporters and oust what he called "this wretched Socialist Government" was made by Hon. Winston Churchill addressing a meeting here. His speech seemed likely to be taken as the opening gun of a predicted Tory drive to defeat the Labor regime.

Personal and sectional aims should be put aside "to avert the decline and fall of the British Empire," the fortunes of which the former chancellor of the exchequer declared he never would have believed could decline so rapidly as they have done of late.

Mr. Churchill devoted much of his ammunition to an attack upon the way the MacDonald Government has been handling the Indian situation, particularly the way in which the Patan tribesmen had come down out of the mountains and were "molesting and insulting a famous city" with a large garrison of British and Indian troops.

"Such a lamentable spectacle would have been impossible in former times," he exclaimed. "It would almost seem that the same spirit of defeatism in high places which is so rapidly throwing India into chaos, has paralyzed military action at Peshawar."

The former chancellor, who referred to Mahatma Gandhi as "this malevolent fanatic," declared that no proposal of dominion status for India would pass even the present House of Commons. While saying this, he re-affirmed the "inflexible resolve of Great Britain to aid the Indian people to fit themselves increasingly for the duties of self-government."

He deplored the exclusion of Sir John Simon, who served on the recent parliamentary commission to India, as chairman for the coming round table conference, and expressed the conviction that the result of this conference would be "confusion worse confounded."

The former chancellor, who has engaged in many wordy duels with Rt. Hon. Philip Snowden, the Laborite holder of Great Britain's purse strings, said that he was unhappy about bad trade and unemployment. He put his views of the Conservative program briefly, asserting that the fall of the Labor Government would restore confidence in the pound and would spread from Britain around the world.

"Industry will be stimulated by a tariff," he said. "Agriculture will be aided by a guarantee. The role will be purged from abuse and imposture and we shall bear out our part in the general revival of national and Imperial strength."

To Celebrate Victory

Six Premiers To Attend Conservative Dinner in Toronto

Toronto, Ont.—Six premiers are expected to attend a dinner here in connection with the annual meeting of the Ontario Conservative Association, November 20 and 21.

Hon. R. B. Bennett, Prime Minister of Canada; and Provincial Premiers F. S. T. Molin, British Columbia; J. T. M. Anderson, Saskatchewan; G. S. Harrington, Nova Scotia; J. B. M. Baxter, New Brunswick; and G. Howard Ferguson, Ontario, will be present at what is planned to be a celebration of the party's victory at the recent Dominion election.

Half a Million For Roads

Quebec, Que.—The sum of \$500,000 was voted by a special order-in-council by the Quebec government at a cabinet meeting for the use of road construction. This sum was added to the regular highway budget of \$12,000,000 and will be used in road building throughout the province, where the unemployment situation is most serious.

Victory Over Reds

Hankow, China.—Chinese press despatches said Kiangsi provincial troops scored a crushing victory over Communists in the western part of that province, killing 4,000 Reds and capturing 2,000 rifles.

W. N. U. 1932

Salvage Abandoned Planes

Two Planes Of McAlpine Party Are Recovered After Enduring Storms Of Last Winter

Edmonton, Alberta.—Beating the Arctic again, Canadian fliers and airplanes have triumphed in a far northern test.

The test constituted a drama in three acts. The first when the McAlpine party was forced to abandon two monoplanes, forced down by fuel shortage, on lonely Dease Point on the Arctic coast, late last autumn. The second act was while the machines remained through an Arctic winter, enduring storms of whose magnitude none can tell. The final act, just completed, was continued in the salvaging of the machines.

One of the monoplanes was the property of Dominion Explorers, Limited. A little over a week ago supplies of gasoline and oil were taken to the scene of the forced landing. The machine was "gassed up" and flown to Coppermine River where, without overhaul it was placed in service.

On Thursday evening last, August 14, the second machine, the property of Western Canada Airways, was reached by Pilot Buchanan and his mechanic, and on Monday evening, August 18, the machine landed at McMurray.

So far as can be seen, the machines suffered no damage through their long stay in the Arctic. Their motors started without difficulty once fuel and oil were provided and there were no visible evidences of deterioration.

The Western Canada Airways machine will undergo a thorough examination at McMurray to determine if a complete overhaul is necessary.

Control Of Immigration

Report Of Royal Saskatchewan Commission On Immigration

Has Been Submitted

Saskatoon, Sask.—Main outline of the report of the Royal Saskatchewan Commission on Immigration and Settlement has already been submitted to Premier J. T. M. Anderson, of Saskatchewan, and the full report will be printed immediately on completion, Dr. W. W. Swanson, chairman, announced here.

Findings and recommendations of the commission are expected to be unanimous, the chairman indicated. The commissioners have reached unanimity on all major issues. In view of the urgency of the question, both in Ottawa and at Regina, and because of changes already made in immigration laws, "everything possible will be done to have the report printed immediately so that it may be made available, through the courtesy of the provincial government, for the information of members of parliament at Ottawa and Regina."

The investigation has been a thorough one. Hearings have been conducted in all parts of the province. Since the commission was appointed last fall about 475 witnesses have been heard and personal investigations have been made by the commissioners.

Soviets To Export Grain

Large Exports Of Wheat, Rye and Oats Expected Next Month

Moscow, Russia.—Large exports of Soviet wheat, rye and oats are expected early next month. It was made known recently, although up to the present time only small shipments of rye have been reported.

The government has declined to give out figures of exports and the time of shipments, on the ground that to do so might affect the market.

The majority of rye crops already have been harvested in the Ukraine, and since the government has purchased about 25 per cent. The amount is reported much below the government expectations, although it is thought that purchases of fall and spring rye will be greatly increased soon.

Oppose Shorter Working Day

Victoria, B.C.—Claiming that it has not been shown that a five-hour day will either increase or spread employment, but rather that it will cause more unemployment, manufacturers of British Columbia will oppose the proposed cut in working hours according to information on the subject sent to the Victoria Chamber of Commerce.

PROMINENT MARKSMAN

Major Fred Richardson, president of the B.C.R.A., who did some sensational shooting at the rifle meet held at Long Branch, Ont. He was the only man to score a possible on the 900-yard range, winning the lieutenant-governor's match with 118 points.

Airplane Fatality

Pilot Is Killed Through Falling Into Propeller Blades

Owen Sound, Ont.—Climbing up on top of the "plane to adjust its motor, George F. Parsons, 32, Toronto, was instantly killed when he fell into the whirling blades of the propeller. Prominent-alarmen believe it is the first fatality of its kind in the history of Dominion aviation.

Parsons, a member of the Toronto Flying Club, and a pilot in the Great War, had flown an amphibian biplane to Wasaga Beach recently. The machine was the only one of its kind in the Dominion, it is claimed. The engine and propeller are situated overhead.

After considerable tinkering, Parsons was able to start the engine, but in getting down he slipped and fell into the whirling blades of the propeller.

Montreal Bank Robbed

Montreal, Que.—A daring and spectacular hold-up was staged here when two armed bandits held up the four employees of the Banque Provinciale, at 4137 St. Catherine Street, East, and a customer, and escaped with \$2,970 of the bank's funds by commandeering a passing taxicab. In their hurry, however, the bandits overlooked \$9,000 which was on a shelf in the bank's booth.

Canadian Beef For Britain

British Market Offers Great Opportunity For Canada

Montreal.—Canadian beef will re-enter the British market for the first time since 1928 with the shipment from Montreal this week of 128 head of grade Hereford and Shorthorn steers, bred in Ontario and now consigned to a firm of importers in Manchester.

The majority of the steers were raised on the farms of P. J. Henry, of Ricketown, Ont., and M. J. Campbell, of Dutton, Ont.

Shippers of livestock believe that the British market, dead for the past few years so far as Canada was concerned, once more offers remarkable opportunities to Canadian breeders, according to Donald Munroe, president of D. Munroe and Sons. One hundred and sixty thousand pounds of dressed beef were shipped from Canada to the United States last year, but for the future such trade is severely hampered by the unfavorable American tariff.

Much of the traffic could, he believes, be diverted to Great Britain. The only competition in the highest grade of beef in the British market comes from the Irish breeders, but it is only seasonal competition and could be met with ease by concentration on the part of Canadian breeders and exporters.

Proposed Health Insurance

Compulsory Form Of State Health Insurance Mooted For B.C.

Victoria, B.C.—Legislation calling for a compulsory form of state health insurance will be placed before the B.C. legislature at its next session, according to reports current at the parliament buildings.

Although the royal commission on state health and maternity benefits has not yet completed its labors, which have taken its members to all parts of the province, it is expected that hearings will conclude and a final report will be ready before the session opens. The report will contain comprehensive recommendations to the legislature on which to frame legislation.

Plan Relief Work

Toronto, Ont.—Announcement has been made by Hon. William Finlayson, Ontario Minister of Lands and Forests, the government is completing a scheme of relief work in Northern Ontario to take care of many of the unemployed lumbermen and mill workers who are faced with destitution during the coming winter.

SETTLEMENT OF DISPUTES UNDER A WORLD COURT

New York.—Dispatches from Geneva to the New York Times report that the British Labor Government is envisaging announcement at the League of Nations assembly session, in September, of its acceptance of the general act for compulsory peaceful settlement of all disputes under the world court.

This step is the outgrowth of signature by all the British dominions of the so-called "optional clause," binding them to accept compulsory jurisdiction of the court. Australia's instrument of ratification to the optional clause, the last of the dominions to do so, was deposited recently.

Rt. Hon. Arthur T. Henderson, foreign secretary, is said already to have opened consultations with the dominions for simultaneous signature at the general act in September, in the same way that they signed the optional clause last year.

Thirty states, or more than half the league's membership, have now signed the optional clause, but only three have bound themselves by the general act. These are Belgium, Denmark and Norway. The French Chamber of Deputies approved it in June, but the senate has not yet acted.

Grow Grain At Churchill

Wheat, Oats and Barley Can Be Successfully Grown At Northern Port

The Pas, Man.—Wheat, oats and barley will be successfully grown at Churchill within four or five years, That was the prediction made here recently by D. A. Brown, of the Federal Government's Experimental Farm at Brandon, Man., who has just returned from a trip on the Hudson Bay Railway.

Mr. Brown, who is supervisor of demonstration farms in western Canada, declares that Hudson Bay climate is not adverse to grain growing. With proper cultivation and good soil, grain will mature well at the seaboard, he believes.

The official inspected the first plot of grains to be grown at the Hudson Bay port. They did not fare very well, partly due to late sowing and lack of good soil, but Mr. Brown states that the experiment was well worth while. Reward and Garret wheat attained a height of 18 inches, but it isn't expected to ripen because it was sown late. Alaska oats has made a fair showing, while Trebil barley has a good chance of ripening.

However, garden produce, such as radishes and lettuce, were raised successfully at Churchill this season. Potatoes did not fare well.

W. Wood, of the railway construction department of the C.N.R., was responsible for the grain-growing experiment at the Hudson Bay port. Grains have matured well at several points along the Bay Railway this year, Mr. Brown reports.

Bandit Robs Calgary Bank

Forces Bank Teller To Hand Over Large Sum and Then Disappears

Calgary, Alberta.—Unmasked and alone a bandit walked into the Elbow Park branch of the Bank of Montreal at 12:15 noon, and at the point of a nickel-plated revolver forced the bank teller to hand over a roll of bills amounting to approximately \$7,500, then backed out of the door and disappeared.

H. H. W. Reysenfeld, the teller, was alone in the bank at the time, the manager, N. T. Woodward being out for lunch. He telephoned the city police immediately and described the bandit as similar in appearance, actions and dress to the unknown man who shot Ernest Midwinter, taxi-driver, to death on the Okotoks road.

Elevator Destroyed By Fire

Winnipeg, Man.—Damage estimated at \$75,000 resulted when the razed the Assiniboine Grain Company elevator in St. Boniface, across the Red River from Winnipeg. The structure was valued at about \$60,000 and it contained 50,000 bushels of barley, property of Ulysses Low and Company, grain merchants. Insurance covers the damage, it is stated.

THE KING'S DOCTOR

Lord Dawson, of Penn, physician to His Majesty King George V, as sketched by Miss Kathleen Shackleton, on board the Canadian Pacific liner "Empress of Australia." Lord Dawson is reputed to have the finest doctor's hands in England, and has the fine features and eyes sometimes recognizable in great artists.

He is looking forward to his first sight of the Rockies and later is going to disappear and take a real holiday out West. A ranch is his ultimate destination.

The Baby Clinic.

To be held in the Town Hall Tuesday Sept. 2d, from 10 a.m. to 5 p.m. Mothers in the community are invited to come, and bring their babies, and children up to six years of age. Free health examination, weighed and measured. "To Keep Well People Well" Dept. Public Health, Nursing Branch.

Accident to Mrs. Hyett

On Tuesday Mrs Hyett made an afternoon call on Mrs H T Walton, Main St. north. While passing thru the screen door, at the front, the spring on the door became unfastened, part of it bounced out, entering the fleshy part of Mrs Hyett's forearm for about three or four inches. The services of neither of our local doctors being available at the time, the sufferer was hurried in to Edmonton, and taken to an hospital, where the wire was extracted, and where she is now resting easily.

Holborn Happenings.

The U. F. W. A. dance last Friday night, in the Hall, attracted the usual good-sized crowd. Barths provided the music.

Mr and Mrs J F Kimmerly and Mr and Mrs Lloyd Kimmerly left this week for their old home town in the Southern States. A farewell party in their honor was given by their friends and neighbors, at their residence, Monday evening. The entire party expected to return next spring.

Stony Plain and District

Wm Comisarow is spending the week at the Jasper Park Lodge, and may be an entrant in the golf tourney.

C. N. Agent Morrison, of Wabamun, motored down to Stony, Monday evening.

Mr E Clarke motored a party down to Cooking Lake on Sunday; while Mr. R. Downs took a carload down to Sylvan Lake.

Mr John P Fuhr has purchased an Essex sedan from Agent Geo. Oppertshausen.

Mr Geo Spike, the well-known butcher, has arranged to open a butcher shop on Main street, next the Phone Office.

Jasper Signal: Born, to Mr and Mrs Franklin K Clarke, on Tuesday, Aug. 19, a son. The Pr. Rupert train was an hour late yesterday morning.

The Royal Cafe has had a new show window built on its western front.

The after-vacation sessions of the local Walther League will open with a social evening Sunday next, the 31st.

There seemed to be something wrong with the Power line Tuesday morning; so the cash register at The Sun office had to be run by hand power that a.m.

Mr and Mrs Ganski, motored up from Portland, Ore., and are visiting at present with Mr and Mrs Dan Gitzel. Mr Ganski farmed in this district fifteen years ago. Mrs Ganski is a brother to Gus Gitzel, and proposes making a trip to Wembley, to see Gus.

Mr Zucht is said to have secured an option on the Horn building, on First street, opposite Zilliox & Kast.

Jack Barrie announces a Midnight Frolic at Edmonton Beach at 12.05 midnight Sunday; Monday being Labor Day.

Owners or the operators of threshing machines and combines are reminded they are required to obtain licenses for operating, from Dept. of Agriculture

Bright Bank Briefs

A real cloud burst visited this district and lodged the heavy grain much.

A M Ellis had a heavy crop of hay on his homestead this year. Some of the Red Top being nearly six feet high.

A motor party of three Fords made a trip to Wabamun, Lac St Ann, Gunn and Onoway. They report that the crops are very good at all points. The party picniced and fished at Lac Ste Ann bringing home with them some very fine fish.

Mr Carl Clausen and family are leaving soon for the Coast, to spend the winter.

Three new threshing out-fits have gone in to Hansen's Corners district this season.

Mr Carl Groskopp had a mild attack of sunstroke last week.

Big Jim had a narrow escape recently while driving the binder. The seat broke, letting him down; the drive wheel catching his clothing and holding him in a bad position until help came.

Some men thirst after a Government job, and others thirst only after salted peanuts.

The Pool's First Payment.

After a number of conferences between the leading bankers of Canada, representatives of the three western governments, and officials of the Canadian wheat pools, as to the initial payment to be made for the wheat in the 1930-1 season, the price has been fixed temporarily at 65 cents. Pool officials held out for a long time for the price to be set at 70c; while the bankers could not see their way clear to agree to an advance of anything over 60c. A happy compromise was finally reached, when the price as stated was agreed on.

Coarse Grains Pool Suspends

Alberta Coarse Grains Pool directors have issued a statement: "The directors of the Alberta Wheat Pool have decided to suspend the operation of the coarse grains pool for the current crop year. Pool elevators will handle coarse grains delivered by the Pool members on a cash basis."

UNITED GRAIN GROWERS LIMITED

A dividend of 8 per cent. per annum has been declared upon the paid-up capital stock of United Grain Growers, Limited, for the financial year ending July 31st, 1930. Cheques will be mailed on September 1st, 1930, to shareholders of record at the close of business July 31st. By order of the Board of Directors.
H. S. LA W, President,
Winnipeg, Man.,
August 21st, 1930.

Spruce Grove News

Mr and Mrs W J Connolly are expected home by the 1st of the month from their trip to Ontario.

Of interest to motorists is the promise that another layer of loose gravel will be laid on the main road.

Where threshing operations have commenced this season the yields are said to be giving a pleasant surprise to some of the producers. The barley on the Frank Wild farm was said to be averaging 45 bu. to the acre.

There will be no service on Sunday next at St Joseph's church, as services will be held at Tomahawk and other western missions. Rev Father Keenan has arranged to have Mission services at St Elizabeth church, Gainford, Sept. 7 to 14. Rev Clement Carroll, C.P., will be in charge.

Miss F Pinchbeck has returned to Jasper, to resume her duties as teacher.

Not wishing to make the trip alone, Big Fat Boy has cancelled his bicycle trip to Banff.

The Postoffice Dept. is calling for tenders, to be in by Sept. 26, for the mail to be carried three times a week on the R.R. now covered by Carrier Johnson.

New Gas Electric Engine

With its eight-cylinder gasoline engine and two electric motors purring and humming in soothing but powerful harmony, No. 47, the Canadian Pacific Railway's new gas-electric combined passenger and baggage car, embodying the latest developments in electro-motive traction, travels between Hamilton and Goderich and its sister car No. 46, between

Ottawa and Wajham. These cars have a range of 400 miles at an average speed of 30 miles an hour, but attain a maximum speed of 65 miles an hour. They comprise a first-class compartment seating 38 passengers, a smoking compartment for 15 people and a 17-foot compartment for baggage and express.

Here and There

(589)

Successful Canadian exhibitors in the International Grain and Hay Show to be held at Chicago, November 28-January 2, will be awarded liberal bonuses in addition to the regular premiums offered in the prize list to be distributed. The provincial governments of Quebec, Ontario, Alberta, Saskatchewan and British Columbia, the Calgary Board of Trade and the Canadian Pacific Railway have also announced offers of special awards for exhibition.

That elk are attracted by music seems to be established by the actions of two fine specimens of that animal which stroll out of the bush when dancing begins at the Banff Springs Hotel every evening. Under the ballroom windows they begin to shake their heads and prance, cavort and caper while the music lasts, not even stopping to eat until the orchestra has ceased playing.

Canadian poultry are rapidly being recognized throughout the world as reaching unusually high standards and recently the S.S. Empress of Canada, clearing from Vancouver to China, Japan and the Philippines, carried 60 head of registered white leghorns consigned to Manila to be used in building up the poultry industry of the islands. The birds came from a poultry farm near Vancouver.

Captain R. W. McMurray, for the past five years marine superintendent of the Canadian Pacific's British Columbia coast steamship service at Vancouver and prior to that commander with the Canadian Pacific trans-Atlantic fleet, has been gassed in the London Times of July 14 captioned in the Royal Naval Reserve, promoted from the rank of commander, R.N.R. Captain McMurray, whose rank is equivalent to the army rank of brigadier-general, is one of the few living Canadians holding such a high position in the R.N.R.

The province of Manitoba last month celebrated its sixtieth birthday. Where 40 years ago the buffalo reigned alone, Manitoban farmers are now pasturing 350,000 horses and 650,000 cattle and the prairie dweller instead of returning to fort or wigwam from his day's work, spends his evenings in his radio-equipped home or motors over good highways to the nearest city.

About a thousand tons of zinc concentrates from Field, B.C., on the main line of the Canadian Pacific Railway, were shipped to Japan recently, this being part of a movement of 1,500 tons monthly from a mine which started five months ago and which ships lead concentrate to California.

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway program of construction, maintenance and improvement from coast to coast of the Dominion. Program includes laying of branch lines, replacing and renovating of right of way, bridges, tunnels, stations, and other buildings. The men in general are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

HER FAT IS MELTING FAST AWAY

All over the world Kruschen Salts is appealing to girls and women who strive for an attractive figure. The fact that figure that cannot fall to win admiration.

Here's the recipe that banishes fat and brings into blossom all the natural attractiveness that every woman possesses.

Every morning take one-half teaspoon of Kruschen Salts in a glass of hot water before breakfast.

Be sure and do this every morning for "It's the daily dose that takes off the fat." Don't miss a morning.

Kruschen daily means that every particle of poisonous waste matter and harmful acids and gases are expelled from the system.

At the same time the stomach, liver, kidneys and bowels are toned up and the pure, fresh blood containing Nature's life-giving salts is carrying to every organ, gland, nerve and fibre of the body, and this is followed by "that Kruschen feeling" of energetic health and activity that is reflected in bright eyes, clear skin, cheerful vivacity and charming figure.

CHAPTER XXVI.—Continued.

"I don't want anything but a cup of tea, dearie, and maybe a slice of toast. I remember Edward Howe saying that old folks don't need much come night. And—see here, childy—the doctor told me about your plans and everything. I guess he thought he'd save you the trouble; and you're not to worry about me. I've always thought it would be kind of fun to live in a small house, and it'll be a sight easier for you. It'll be easier for me, too, not to go over the stairs come night. Besides, I'll be able to see a half block farther down the street from that window! And it's going to be wonderful having you home all day. You needn't worry a mite about how I'll take it, Char. Between you and me, dearie, I think it's going to be fun!"

Only after the girl had turned away, unheeded, and begun to speak at this display of bravery, did the old lips tremble.

"Thank God that's over," murmured Grandma brokenly, while two big tears crept slowly down over her wrinkled cheeks.

CHAPTER XXVII

There were times during the days that followed when Charmian found it difficult to believe that she and Grandma would ever leave the shelter of the homestead. They seldom talked about it, but when the impending changes could not be ignored, the old lady spoke cheerfully, stoically refusing admittance to the tears that lay so near the surface. Only when she was alone did her face show any of the dismay that filled her tired old heart. These were hard days for Grandma Davis.

"Seems somehow as if she's grown smaller—shrunken, you might say," commented Lizzie Baker to Salina Knowles. "It ain't easy to make changes at Grandma's age; and she's keepin' up before Charmian more'n's good for her. And I'm sorry for Charmian, too. I ain't ever see a young person that set such store on anything odd as she does on that old house. I declare, Salina, there's times when I wish whoever's buyin' it would back out of his bargain."

But Miss Lizzie was not to get her wish. It was the last day of August when George K. called on Charmian as she passed the bank, and led her into the little room which had been a formid-

able "Private" on its door; but which was in reality no more private than the air we breathe, because only on rare occasions did the president of the Wickfield National close his door. He closed it now, however, and asked: "What do you want to see this afternoon?"

Charmian smiled as she responded: "Why all this privacy? I've been to the library, as you might deduce from the fact that I'm here. But I got more than the books, Uncle George. I got a job! Miss Garfield has asked me to help at the library two hours each afternoon. Isn't that wonderful? I can easily leave Grandma that long, or get Miss Lizzie to come in and sit with her; and it will bring in a little money. It was Gam's idea. I'm going to stop at his office now and thank him."

"Well, that's fine!" George K. spoke cheerfully. "I'll do you good to get away each day, and see folks. What I called you in for, Charmian, was to say that you can sign the deed at ten o'clock tomorrow. I just got word that your name will be here, then, and wants to see you. I told him to come to the bank—thought maybe it would be hard for Grandma to see the act done, as you might say. I'm thankful now, child, that she decided the place to you. It would be hard for her to sign the house away. There, Charmian, if you feel like crying, cry on my shoulder; but I advise you to buck up. In the long run most things come out right in this old world. If I didn't believe that truth I shouldn't be as happy as I am, or as fat, either!"

"Or so helpful to the rest of us," added Charmian. "It's all right, Uncle George. I did my crying long ago, and have since acquired such a stiff upper lip that it sometimes hurts! But as Grandma's probably braved a great deal more, I don't complain. I'll be here at ten. Now I must run up and thank Gam Garfield for his suggestion, and then skip home. Thanks for—everything."

"Haven't you forgotten something?" asked George K. as she reached the door.

Charmian turned; her eyes aglow with sudden merriment. This was an old joke of childhood's days, when as a little lass she often slipped into the room marked "Private," in search of the new pin-checker which George K. used to tell her "grew in his pockets." If, in those days, she forgot to bestow upon him a grateful kiss, he reminded her thusly and was rewarded by a sometimes straggling embrace. She came back now, laughing as she kissed him. Then the door closed behind her, while George K., watching from a window, saw her cross the street and start up the narrow stairs that led to Gam Garfield's office in the building opposite.

"My Bill must have been crazy when he let that girl slip through his fingers," he complained to the four walls. "However, all's well that ends well, and I hope so."

What he hoped was interrupted by a fellow banker from Eastboro, who, as was everybody's custom, walked in minus the formality of a knock.

Charmian, finding Gamaliel busy with a client, delivered her thanks briefly and moved on up Main Street with lagging feet. No need to tell Grandma that the deed day was at hand, she thought. Let her sleep in peace this last night under her own roof. As for herself, she was laughing at the lump in her throat and remember, as George K. said, that things usually turn out all right. It was wonderful that Miss Garfield needed help at the library just now. She wrote him to write to "the girl he left behind him," thought Charmian whimsically; and, having reached the house, stopped to look up at the carved pineapple above the door.

"I hope they'll give it the coat of gold leaf it deserves," she said, and went inside, laid her books on the table by the door, and then stood still, staring into the room that had been a shop for almost as long as she remembered.

"Haven't you a word of greeting for the returned prodigal?" asked Jim Bennett.

He arose from where he was sitting beside Grandma, and caught Charmian's hands in both of his. "Steady!" he said. "Folks have been known to expire of shock I'd have warned you of my arrival but I started at a moment's notice, al-

most. Sit down, Charmian, and catch your breath."

He pushed her gently into the rocking chair, and drew up a straight-backed old Chippendale for himself. In a sort of daze Charmian heard her grandmother say anxiously: "Hidert you better get her a drink of water?"—and at that she laughed.

"I'm not faint," she protested, "merely struck dumb, as you might say. Jimmy, you look well." "Different, doesn't he?" put in Grandma; and Charmian, noticing her for the first time since this amazing homecoming, saw that her sweet old face looked happier than it had for days. "He's got a sort of air about him," she was saying. "I saw it right off when he came in. He looks—stylish."

"Gosh!" breathed Jim. "You talk like my mother before she fell in love with a fruit ranch!"

Charmian laughed, spontaneously, and Grandma asked: "You mean you're playing second fiddle these days?"

"Something mighty near it," grinned Jim. "Will you believe it, Grandma, my dotting mother hardly noticed when I deserted. I left her sampling a new variety of citron. Gee! but it's good to be home!"

"Then you haven't fallen in love with—?" began Charmian, when Grandma interrupted in horrified reproach.

"What do you mean, child, asking such a question?"

"I was only going to say in love with California," explained the girl, and Jimmy roared.

"No," he replied, after his mirth had somewhat subsided, "I didn't lose my heart to—California. It has its good points, of course. Mother and Aunt Sophie are nuts over it—boast of it all 'em; but so far as I'm concerned, swap one of Wickfield's winding, elm-shaded streets for the whole darn state of California, and that's the truth."

"There!" ejaculated Grandma with satisfaction. "I always said that there's not a prettier spot on earth than Wickfield. Here comes the doctor, Charmian. He seems to be in a hurry. Maybe—"

But with haste that seemed to both Grandma and the young man rather uncalled for, Charmian sprang up, and was at the door when John Carter reached the steps. She did not guess that in the moment that followed, both those loyal hearts in the room beyond were to be wrenched almost to the breaking point. She did not realize that the front door was reflected in the long mirror that hung beside it, or would it have troubled her if she had known. All she saw or thought of was the light in John Carter's eyes as he thrust a scrap of yellow paper into her hands. She read the message and looked up, her lovely face reflecting the happiness that shone from his; and the next moment he caught her in his arms and kissed her, rapturously, excitedly. . . . (Continued.)

Increased Wheat Consumption

Strong Tendency Of Tropical Countries To Use More Flour

A report issued by the Ford Research Institute, of Stanford University, California, shows a strong tendency towards increased wheat consumption on the part of tropical countries. The survey covers the years from 1909 to 1927, and reveals a growth in the consumption of wheat flour in excess of the growth of population; the years from 1909 to 1913 showing an annual average per capita use of 11.24 pounds of flour, while the period from 1923 to 1927 shows a rise to 12.67 per cent.

LUMBAGO?

A pain in the lower part of your back can torture you. But not for long, if you know about Aspirin! These harmless, pleasant tablets take away the misery of lumbago, rheumatism, neuralgia, headaches, toothaches, and systemic pains of women. Relief comes promptly; is complete. Genuine Aspirin cannot depress the heart. Look for the Bayer cross, thus:

WHOLE FAMILY HAD DYSENTERY

Dysentery is one of the worst forms of bowel complaint and should be checked at once as its termination often proves fatal.

Mrs. H. F. Stewart, Findlater, Sask., writes: "Two years ago we were all very bad with attacks of dysentery. My husband got a bottle of Dr. Fowler's Extract of Wild Strawberry and after taking three or four doses we were completely relieved. Since then we have never been without a bottle of it in the house."

On the market for the past 85 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Explore Arctic With Submarine

Sir Hubert Wilkins To Cross Polar Regions By Undersea Passage

Sir Hubert Wilkins, arriving in New York on the North German Lloyd liner "Bremen," announced that he had virtually completed plans for his undersea passage in the North Polar regions, which he will undertake next summer in an obsolete submarine, which will be placed at his disposal by the Navy Department.

He has gone to Philadelphia to examine the discarded submarine O-12, which he plans to rechristen the "Nautilus." In this out-of-date craft, Sir Hubert, with several chief scientists and a crew of 15, will explore beneath the ice-choked waters for a period of about 50 days.

Sir Hubert expects to cover some 2,500 miles during this period. The submarine will be equipped with an ice-cutting device that will bore a hole upward, when the submarine's super-structure is close to the bottom of the ice floes. He will thus be able to send men to the surface of the North Pole without the ice obstructing experiments and make observations.

The submarine will attain the speed of between three and four knots, when submerged. He expects to leave New York next May in the submarine and proceed to Spitzbergen. From that port he will then begin his undersea studies of currents, etc., and will pass under the North Pole enroute to the ice floes of the Behring Sea.

During the passage beneath the surface of the northern waters, Sir Hubert plans to broadcast daily with a special radio set. The submarine is 175 feet in length. Among those who will accompany the explorer on his Polar voyage will be Dr. H. V. Sverdrup, who accompanied Amundsen on several explorations, and Dr. Behning Melander.

Persian Balm — the one toilet requisite for the dainty woman. Delightful to use. Leaves no stickiness. Swiftly absorbed by the tissues. Delicately fragrant. Imparts a velvety loveliness to the complexion. Tones up the skin. Softens and banishes all unpleasant roughness or chafing caused by heat and other weather conditions. Makes hands soft and white. Creates an elusive, sensationally charming charm. Persian Balm is indispensable to women of refinement.

A Valuable Stamp

One Cent Stamp Issued Many Years Ago Now Worth \$40,000

Probably the most classic example of the economic law that scarcity creates value is on exhibition in Boston, Mass.—a one cent stamp worth \$40,000.

It is the property of Arthur Hind, Union, N.Y., manufacturer, hotel owner and philanthropist, whose \$500,000 collection of stamps constitutes, financially speaking, just about half of the National Philatelic exhibition of 1930, which was opened at Horticultural Hall, in Boston, Mass.

The history of the stamp goes back to 1866, and to British Guiana. The postmaster of that then isolated colony had found his supply of stamps exhausted. In the emergency a local printer was called into conference, and, with the aid of a picture of a ship, borrowed from a local newspaper, and a hand-set inscription, the stamp was turned out.

A few days later the regular supply arrived and the makeshift were destroyed. Sixty years later, the only known copy came into the possession of Hind for \$32,000, and today collectors say it is worth at least \$40,000.

Keeping World Supplied With Paper

The forests of Canada continue to be the chief source of the world's paper supply. During June, Canadian paper was exported to 33 countries, ranging alphabetically from Australia to Uruguay.

Minard's Liniment for Lumbago and Neuralgia.

Little Helps For This Week

"Let thine heart keep my commandments."—Proverbs 1:1.

Rabbi Jehoshua had the skill To know that heaven is in God's will; And doing that, though for a space One heart-beat long, may win a grace As full of grandeur and of glow As princes of the chariot know.

—James Russell Lowell.

God would have us live; if we live we cannot but give, while all the knowledge in the universe cannot make us live. Obedience is the road to all things. It is the only way to grow able to trust Him. Love and faith and obedience are sides of the same prism.—George MacDonald.

Choked For Air. Some little irritants become lodged in the bronchial tubes, others gather, and the severe choking of asthma results. Nothing offers quite such quick and positive relief as Dr. J. D. Kellogg's Asthma Remedy. The healing, soothing smoke or vapor penetrates, clears the passages and gives untold relief. It has behind it years of success. It is the sure remedy for every sufferer.

Hittite Castle Door

The Chicago Oriental Institute Makes Interesting Discovery

The Chicago Oriental Institute expedition, excavating at Alkisar, has discovered a large Hittite castle door ornamented with bas-reliefs representing deer. The door has been transferred to the Angora Museum.

Road builders in Scandinavia recently uncovered a chiseled stone, which aroused the curiosity of a highway engineer. He continued the digging and found Byzantine vases and pieces of money, apparently deliberately buried beneath the rock, which may mark a treasure trove.

For all Skin Abrasions — Minard's Liniment.

U. S. Cost Of Living

The United States Department of Labor, through the bureau of labor statistics, has issued a report on changes in the cost of living in the United States in recent years. It shows a decrease of 2.1 per cent. between June, 1929, and June, 1930. The information given is based on actual prices obtained from merchants and dealers in 32 representative cities.

If baby has COLIC

ACRY in the night. Colic! No cause for alarm if Castoria is handy. The pure vegetable preparation brings quick comfort, and can never harm. It is the sensible thing when tiny tongues are coiled, or the stomach, or the little bowels; colic or constipation; or diarrhea. When tiny tongues are coiled, or the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and its mildness makes it safe for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

Fletcher's CASTORIA

The Handy Bottle

Minard's is the sure relief in the Handy Bottle. For strains, burns, bruises, boils and blisters.

A Grave Warning Is Issued to Farmers.

(By H. G. L. Strange.)

The Dominion Entomologists of Lethbridge and Saskatoon, H. L. Seamans and K. M. King, have issued a very grave warning to all farmers in Alberta and Saskatchewan regarding the great damage to crops that may occur next year because of the cutworm.

The dry May and part of June that has been experienced in most parts of Alberta and Saskatchewan this year has tended enormously to increase this insect pest, and it is expected that unless May and June of 1931 are much wetter than is usually the case, that the greatest and most widespread damage that has ever been experienced will result from cutworms. Most of Saskatchewan, south of Saskatoon, it is expected, will be badly affected, with the worst damage within a hundred miles radius of Regina. In Alberta, the damage will probably be very general east of a line from Edmonton to Macleod and as far south as the Lethbridge-Medicine Hat line of the C. P. Railway.

The damage to the 1931 crop will depend absolutely upon the way fields are handled this present August and September. The moth of the cutworm flies across the fields and lays its eggs, starting in the first few days in August, reaching its maximum flight about the 20th, and continuing to fly and lay eggs until about the middle of Sept. This moth will avoid all land that has had even a very slight crust formed upon it by rainfall, but will lay its eggs upon any soil where this crust has been broken, however slightly. To avoid cutworm damage on a field it is necessary on summerfallow fields all work should stop by Aug. 1 or a very few days after. Then a very slight rain will form a crust on these fields, rendering them immune the following year from cutworm damage. It is important that no stock, implements or wagons be allowed to cross summerfallow prepared in this fashion, as wherever the crust is broken by animals or implements, there the moth lays eggs, and considerable damage will be seen the following year. On fields in crop, where harvesting operations are conducted before Sept. 1, then damage the following year is almost certain to be experienced unless these fields are summerfallowed.

It is apparent, therefore, that all fields which are cropped this year should be summerfallowed in 1931. In addition, all work on summerfallow this year should cease as soon after Aug. 1 as possible, and that nothing be allowed to cross these fields.

H. L. Seamans, Dominion Entomologist stationed at Lethbridge Laboratory, without hesitation states that it is far better to allow weeds to grow on summerfallow after Aug. 1 in these affected areas, rather than disturb the crust of the soil and so invite cutworm damage.

A Few Words for the Motorist.

Western Motordom: The present season has brought to light the weakness of the present system of highway maintenance, and has also brought into prominence the danger of promiscuous spreading of gravel on both the trunk highways and the municipal roads.

On many occasions the Manitoba Motor League has called the attention of the Good Roads Dept. to the danger which exists following the spreading of a layer of gravel to a depth of several inches, and has suggested that the scatter system of spreading gravel would not only be safer but would also be more effective and tend to lower the cost of maintenance, at the same time producing a road which could be driven over the entire width of the surface. In other words, the contention of the Motor League is that the gravel should never be put on the highway at any time to a greater depth than half an inch, and the surface maintained in a smooth condition by the proper use of the maintenance outfits. Then as soon as the gravel was properly consolidated, a further application of half an inch of gravel should be spread, and the treatment continued in this manner until the road surface had been covered with a sufficient depth of gravel to carry the traffic.

During the present year practically every road in the province of Manitoba has been put into an unsafe condition by the indiscriminate use of gravel, with the natural result

Stony Plain and District

Monday next (Sept. 2) being a public holiday, all places of business in Stony Plain will be closed.

Shoppers will note that the Wednesday half holiday season in Stony Plain has closed; and that the places of business will now be open all day every business day.

Miss Mabel Witmer returned home on Friday from an Edmonton hospital, where she had undergone a major operation.

Mr and Mrs Wight and family moved, on Monday, to their new residence on Edmonton's south side.

Mr and Mrs. E. H. Pidgion spent Sunday with friends at Duffield.

Do not neglect your eyes. Get them now! Charges are reasonable, \$10.00 and upwards. The very latest, best frames and lenses only supplied. At Royal Hotel on Monday Sept. 8th., and every three weeks afterwards. M. M. Mecklenburg.

Beware the Cutworm!

The attention of farmers and gardeners is called to the very important article in this week's issue on the cutworm, edited by Major H. G. L. Strange. While some damage was done locally the season just passing, the warning is given that even more damage will result in the season of 1931 unless the farmers themselves take the necessary preventive measures, as set forth in the article mentioned.

Miss Hartley Honored.

A former teacher at the local school, Miss Ethel M. Hartley, has just been made the recipient of a scholarship from the chancellor of the University of Alberta. The scholarship is the gift of the French Government. Since relinquishing her duties as a teacher, Miss Hartley has been attending lectures at the University of Alberta, and has completed a brilliant course, graduating with honors in French and Latin. Last May she was awarded her degree of B. A. The scholarship has a moiety of 11,000 francs (about \$2000) added, and also provides for a year's study at one of the universities in France.

that accidents have been common and property damage has been excessive.

It is impossible, for engineers to produce a good road surface when the gravel is put on too thickly for the first coat, as the natural result is that the traffic wears a double line of ruts thru the gravel and the road is only properly consolidated in the line of the ruts. If the scatter system of spreading the gravel were followed, the traffic would, from the commencement of the work, travel over the entire surface of the road, and there would be an absence of the regrettable accidents due to the car swerving in the gravel and taking the ditch, often with disastrous results.

The motorists of the four western provinces should combine to impress on their respective governments the desirability of greater attention being given to the safety of the public rather than to seeing how quickly a contractor could get rid of the job of placing a certain yardage of gravel on the highway.

News of the Teachers.

The pupils of the local school re-assembled Tuesday morning, the school opening with a record attendance.

Manly Donaldson leaves this week for Faust, Lesser Slave Lake district, where he will teach school.

Mr G. Horsford, who has taught in nearby schools for the past few years, has secured an appointment to a position on the staff of the Edmonton schools.

Mr Ames, who was principal of Stony Consolidated for the past year, has re-engaged with Vegreville school board, Stony Plain—F. Tilton B. A.; Durward Mayor, Miss Miller and Miss Madden.

St. Matthew No. 1—W. Rosnan, No. 2—Philip Enders.

S. P. Centre—Edith Stewart (Garden Valley)—J. Moseley and Irene Porter.

Rosenthal—Pearl Coates Connet—Mr Murray.

Warden—Helen Wilbey Cottage Lake—Miss Robertson Carvel—Miss Fennie.

Mewasin—Will Maclean Holborn—Wm Mills.

Blusherry—Miss Holmgren and Miss Maclean.

Hollywood—Val Paul.

Glory Hills—Mr Jacobs and Viola Mansaray.

Muir Lake—Gordon Willie Spruce Grove—Leo Piercey and Viola Zimmer.

St. John—Miss M. Pinchbeck Michael—Japh. Barnett.

Weidenheimers—Miss Parker Lakemere—Mr C. L. Price.

Tb. Gamble at Chipman Ralph Witherspoon at Fairview.

Mr and Mrs. C. P. Reid at Opal Manly Donaldson at Faust.

August Mohr at Mundare Glen Carmichael at Windfall.

Margaret Paul at Ravif Miss Queenie Donaldson at Behrens.

Dick Timm at Bruce.

Open Seasons for Game

Following are open seasons for game—

Ducks and Geese—Sept 16 to Dec 14th.

Hungarian Partridge—Oct 1 to Nov. 14.

Prairie Chicken—Oct. 1-15.

Deer—Nov. 1 to Dec 14.

Otter, Nov. 1 to May 1.

Beaver, No Open Season.

Muskrat—Between North Sask. River and Tp. 91, March 15 to April 30.

Game Licenses can be had at Sun Office, where copies of the Game Act can be seen.

Two girls wanted, one for waitress and one for kitchen work. Apply at Christie's Restaurant.

Mecklenburg, Optician.

Reasons why you should consult me about your eyes.

1—I am qualified, graduated, holder of 4 diplomas.

2—I have had 40 years experience.

3—I have practiced in the west for 27 years.

4—I have practiced in Montreal, New York and New Haven.

5—I charge you for Skill, Experience and Knowledge, and not for glasses.

6—I give you the very latest and best quality in frames lens and artificial eyes.

7—My charges are lower, for I pay no commissions, nor do I split fees.

8—I pay no exorbitant rent for stores down stairs. I am up one floor.

9—I visit your town regularly.

10—I give polite, courteous and considerate attention.

11—I save you 25 per cent on all optical work.

M. M. Mecklenburg 10170—101st Street, Edmonton, at Stony Plain Monday Sept. 8 and every 3 weeks hereafter.
